2+ years as Python Engineer primarily working on Web frameworks interested in Engineering, Finance, Data Science, AI/ML, Cyber Security and IOT. Analytical, motivated, enthusiastic, curious learner and committed to continuous improvement looking to use my advanced development skills to build and enhance software/applications for diverse industries.

Experience

January 2021 - August 2022

DuckDuckgo - *Software Engineer*

- Building a AIAgent using OPENAI API and python.

January 2021 - August 2022

Cyber Inquest Pvt Ltd, Kirtipur-NEPAL - *Software Engineer*

- Designed and built the backend architecture of an internal software system for a B2B company, automating order management and monitoring of store stocks. This increased production speed by 22%
- Developed 100% RESTful API using Django and MySQL for controlling user functions, integrating with JavaScript/Flutter on the frontend.
- Create new text mining tools to improve data collection efficiency.
- Implemented responsive and user-friendly front-end interfaces using HTML, CSS and JavaScript frameworks.
- Mentored and provided guidance to 3 junior backend developers on Django and documented best practices within the organization.

Skills

- Programming language: Python, JavaScript, TypeScript, Dart, SQL, HTML, CSS, HTMLX
- Frameworks: Django, Flask, Rest-framework, ReactJS, Flutter, Android, Django-Ninja, jupyter notebook
- Databases: MySQL, PostgreSQL, MongoDB, Elasticsearch
- Web Technologies: jQuery, Ajax, Axios, Redux, Redis, Celery, Vite, Tailwind, Bootstrap, CORS
- Version Control: Git, Github, Github Actions, Gitlab, Jira
- Deployment: Docker, Digital Ocean, AWS(Coursera)
- Libraries: Numpy, Pandas, BeautifulSoup, Tensorflow, OpenAI
- CLI: Powershell, bash, cmd
- Testing: Unit Testing, Test-driven development (TDD)
- Problem-solving and debugging skills
- Software Development, Backend Development, Agile
- Strong understanding of object-oriented programming (OOP) concepts.

Academic

October 2016 - February 2020

National College of Engineering-Tribhuvan University, Talchikhel-Lalitpur-Nepal - *Degree*

Bachelor's Degree In Computer Engineering - Full Scholarship (2nd Highest rank among peers)

Awards/Achievement

December 2019 - March 2021

- Major Project

  Digitalize traditional educational systems by developing Student Learning Platform using Python/Flask, HTML, CSS, JS/JQuery with HLS and AI-based Questionnaire system. Users can sign up/login on the platform and watch videos of their subject selecting the semester and course of the study. After the completion of the video, students can take part in Q/A generated about the information from the videos.

February 2019 - July 2019

- Minor Project

  Taxi Management Mobile app developed using Java (Android) and Google Maps to manage, operate and regulate the services. Users can select as a driver or customer and login/signup and select current position and destination to search for any cab drivers nearby. After the completion of the trip, the app will auto generate a payment according to the distance covered.

April 2018

- Programming Language Training

  Successful Completion of JAVA Training (135 Hours) from BROADWAY INFOSYS resulting in gaining knowledge of beginner and core programming.

February 2018

- Certificate Of Appreciation

  1. Organized TECH event (YATRA 1.0) with NCE IT CLUB & NCE ROBOTICS CLUB on the 17th and 18th of February.
  2. Negotiated with companies from Tech Industry (KUNYO.CO, NIU) for sponsoring the event.
